

What a better tomorrow would look like to me:

Our environment is killing the animals we know and love, like tigers, birds, and types of snakes. An awesome tomorrow would look like this to me; no environments polluted, no pollution in the sky or sea! No more animals dying, or going into extinction. We need a clean environment, so turtles can swim so free. A wonderful clean environment, one a better tomorrow would be. An excellent no extinction place, one just for you and me!
